Airport Business is doing great! Cox and St. John's helicopters are hangared and gassed right here. Community and city relationships have been very positive.

Guests for the evening were Stanton and Dennis from HAL (Higginsville Avionics Lab, Inc). Both provided the chapter with a wonderful informational meeting about new available avionics. They demonstrated the new Garmin 296 showing how much faster, and clearer it is. HAL is involved in cut panels for instruments. Several panels were passed around. The value that these panels can add to your plane was described. HAL uses the best wires, tools and equipment when installing any avionics. Warranty on work lasts forever.
