

Code Wheels

Paste this page on thin cardboard, cut out the wheels, punch a hole in the centers, and put them together with a paper fastener. Spin the inner wheel to a point that you and the reader agree on, then write your message using the numbers that correspond to the letters. Some people write a date, uncoded, at the beginning of their message to tell the reader how to align the wheel. For example September 12th would mean to align "S" with "12." The date doesn't have to be real. Remember not to go past the 26th. There are only 26 letters.

Try to read this message:

July 26, 1984

13, 3, 16, 25
20
13, 3, 1, 1
