Supporting the Community Over the Summer

Library	Bleachers	House Painting
During the post construction cleanup night at the Carnegie Library, the club presented a \$1,000 check for the library. If you have not visited the expanded library, you should.	The club provided \$500 toward a set of mobile bleachers that can be used for sports or community activities. The bleachers are currently on the south side of the football field.	Despite the numerous rain delays and heat delays, the house painting project was completed over the summer.

Board votes to get involved in paper recycling

Paper recycling headed the agenda for the August board meeting. A note from the Dell Rapids Lions provided information about the work their club was doing to recycle paper as a community service project and fund raiser. Locally, the SDDC is currently involved with paper recycling and they were contacted about the possibility.

SDDC representatives attended the meeting and were very interested in a collaboration with the Lions Club. The project would mean that the SDDC recycling would continue but that the purchaser of the paper and transportation would be changed. The Lions Club agreed to provide community interface, publicity and a public collection facility similar to the can bank in exchange for a share of the profits.

During the board meeting numerous ideas were discussed, but specifics were left to be discussed with the general membership during the August meeting.

SDDC Health Fair

The Lions will be participating in the SDDC Health Fair October 28. Currently, the plan is to have a booth in the gym instead of the mobile screening unit.

At this point we have committed to one 8 foot table. Electricity is available.

Ideas for the booth and possible activities are open for discussion. Please bring your ideas to the August 26th meeting.

Submit comments and suggestions and story ideas using the club website.
