

# **QUICK TIPS - - CRITTER PREVENTION\***

## **QUICK TIPS:**

- 1. Store bird or pet food in sealed plastic containers (not just plastic bags).**
- 2. Fill all holes along foundation and roof line to exclude entry.**
- 3. Keep trash can lids secure.**
- 4. Control the bug population because they are food for critters.**

## **ANIMAL EXCLUSION POINTS**

**A. Plumbing Vents: animals seeking shelter can become stuck in plumbing pipes.**

**B. Roof and fascia spaces: Poorly sealed points between roof and fascia invite animal entry.**

**C. Roof vents: Lightweight, flimsy vents should be replaced with heavy secure roof vents.**

**D. Roof/Soffit Intersection: securing gaps will help prevent animal chewing and entry.**

**E. Holes in siding: repairing and reinforcing holes will discourage animal infestation.**
