

It's time to make a big difference for YOUR kids! Legislators at the WI PTA Legislative Conference held on Friday, January 25 in Madison stated that they WANT to hear from the parents (that means you!!!) on how the School Funding issue is affecting their children.

Legislative Alert January 2007: The Wisconsin School Funding Formula is hurting your children. Under the present system, school districts, such as ours, will be forced to choose between educational programming and paying for heat, transportation, and infrastructure! This situation exists because of revenue caps which limit the amount of money districts may spend without regard for increased costs and changing needs. Until the school funding system is changed, districts will continue to face these awful choices.

No time? No problem! Just cut and paste below (make sure to add in the correct identifying information) and e-mail to your Assemblyperson and Senator.

Dear _____,

I am writing to ask you to support AJR35 to reform the state school funding system. I am a parent in Wauwatosa with a child/children at insert name of public school. I am aware that school districts are being forced to cut programs because of the present school funding system and I want you to support AJR35's effort to reform the school funding system by July 1, 2009.

Sincerely,

Name
